

PRODUCT SPECIFICATION SHEET

Gemini LED Light Source

Rev. C2

A slimline light source with a high colour rendering index, making it very suitable for display case illumination.

Powerful light output combined with a very high colour rendering index of >93, as well as cool and near silent operation make this unit the obvious choice when using fibre optics to illuminate exhibits in museum and gallery display cases.

With a 50,000 hour lamp life, using this light source means that costly and time consuming maintenance costs are reduced to almost nil.

Maximum flexibility is ensured with a DMX, 0-10V or manually controlled dimming system.

Fitted with a standard 30mm fibre port connector, this light source is suitable for both new installations and retro-fitting to existing fibre optic installations.
